

# INKJET

## PRODUCT FEATURES

Primarily used for desktop applications, inkjet technology is also used in commercial applications for dynamic, versatile, full-color reproduction. Liquid inks sit on top of the substrate for vibrant, glossy, uniform images and type on a variety of substrates including both uncoated and coated papers. Inkjet is truly the most affordable equipment making professional-looking monotone and color printing accessible to virtually everyone.

### COATED INKJET

- Kromekote Inkjet products are specially engineered for desktop inkjet printing. Please consult your equipment guidelines and adjust your device settings to ensure optimum print performance.
- Due to the unique coating of Kromekote Inkjet, we cannot recommend pre-printing.
- Kromekote Inkjet products are packaged in shelf-ready retail packaging unless otherwise noted.

### UNCOATED INKJET
