

# XEIKON

## PRODUCT FEATURES

Screens of 85-170 lines per inch produce pinpoint-sharp images and faithfully match subtle tones, comparable to traditional printed documents. Xeikon offers variable printing, one-pass duplex printing, and is available in roll-fed and new sheet-fed presses. Printed materials come off the press dry, ready to be finished and packaged. Advanced process controls guarantee reliable and consistent production, not to mention easy setup. Banner printing is made easy with Xeikon technology. In fact, you can print banners with one continuous image up to 36 feet long – the only limiting factor is the size of your software file.

- Scripting documents accompany each SMART Papers Xeikon stock order.
- Glossy cast coated Kromekote offers a unique aesthetic contrasting dull with gloss for maximum impact.
- Large diameter rolls (minimize waste, set-up time, and ease finishing) are available on a custom basis – contact your SMART Papers merchant or sales representative.
- Any color, weight, and/or finish are available on a custom basis – consult your SMART Papers merchant or sales representative.

**Stock - No minimum order quantity – order as little as one roll!**
