

LASER

PRODUCT FEATURES

Laser, or electrophotographic technology, is suitable for small or large jobs using desktop or commercial-size equipment. It offers durable performance through imaging and finishing. Both color laser printing and copying equipment are available to produce original or copied color images. The ease of operation; one-touch printing; ability to be networked (high speed makes this desirable); and affordability of laser equipment (with many models available at virtually unlimited price levels) make color laser printing possible for just about anyone on just about any smooth substrate.

- Pegasus Color Copy is engineered for multipurpose use. Pegasus Color Copy is guaranteed for optimum performance in all desktop inkjet and laser devices, as well as, production color and black and white copiers.
- Kromekote Laser High Gloss is specifically designed for exceptional performance in desktop and production laser printers. Kromekote Laser High Gloss is the best choice when toner coverage is heavy and adhesion is critical.
- Knightkote Matte is also designed for excellent performance in desktop and production laser printers. 7pt and 9pt Return Card are postal compliant.
- Kromekote Laser High Gloss and Knightkote can be offset preprinted. Proper care needs to be taken when preprinting to make sure the surface of the unprinted area does not change. If the surface materially changes our imaging guarantee cannot be applied.
- Kromekote is suitable for desktop and production laser printers.
- Kromekote Color Laser Textured papers are designed with a special laser coating that has been embossed with unique, but subtle surface patterns. Kromekote Color Laser Textured papers are guaranteed for production laser devices.
- Kromekote Tuffkote is a super-durable tear-resistant paper guaranteed for laser printing on desktop and production devices.
- All 24lb writing and 70lb Text and up to 8pt cover stock, in all of the SMART uncoated brands, in smooth, vellum, linen, laid, felt and groove finishes are designed to perform in laser and multifunction electronic devices.

Stock - No minimum order quantity – order as little as one carton!
