

# KROMEKOTE TUFFKOTE TEAR RESISTANT C2S COVER

NOVEMBER 2007

## PRODUCT FEATURES

Kromekote® Tuffkote products are super-durable, tear-, water-, grease and weather-resistant papers. Tuffkote products have the same superior printing characteristics that have made our Kromekote® products legendary. Kromekote® Tuffkote is specifically designed for optimum performance in toner-based laser printing. Kromekote® Tuffkote is also suitable for offset, flexographic, gravure, letterpress and screen printing.

- Tough tear-, water-, grease- and weather- resistant laminate construction.
- Pure white shade for true color reproduction.
- Mirror-smooth cast coated surface produces exceptional printed gloss.
- Balanced coating design provides excellent toner receptivity and improved edge chipping and dusting resistance.
- Exceptionally priced to compete with the synthetic sheets in the market.
- Made in the USA.

Kromekote® Tuffkote is suitable for both small and large laser (electrophotography) jobs. The ease of operation, one-touch printing, ability to be networked (high speed makes this practical), and affordability of laser equipment make color laser printing possible for just about anyone.

Kromekote® Tuffkote offers durable performance through imaging and finishing. This extra tough, tear-resistant paper is excellent for any type of printing process and is the perfect product for those applications where durability is a must. (ie – maps, menus, id cards, signage, etc)

## SPECIFICATIONS

Caliper	Basis Weight *	GSM	Brightness	Gloss
10 pt	97	263	90	82

\* Calculated using 20x26 / 500 sheets
